Rama Sirisha Adharapurapu

HR Executive & ISO Coordinator · HR + Applied AI

Hyderabad, Telangana · 9515108217 · a.ramasirisha@gmail.com · LinkedIn · HireProof live demo

PROFESSIONAL SUMMARY

HR Executive and ISO Coordinator with hands-on experience across full-cycle recruitment, the employee lifecycle, and ISO 9001:2015 and ISO 27001:2022 documentation, supporting the company's initial certification to both standards. A computer science graduate who applies Generative AI to real HR problems: built HireProof, a privacy-first resume screening tool, and Custom GPTs for policy and job description drafting. Seeking HR-tech and People + AI roles where process knowledge and applied AI meet.

PROFESSIONAL EXPERIENCE

HR Executive & ISO Coordinator

December 2024 – Present

QualiQuest Technologies Pvt. Ltd.

Talent acquisition and onboarding

- Run end-to-end recruitment with the team for **10+ hires**, sourced through internal referrals and job postings: resume screening, interview scheduling with department heads and offer letters.
- Lead onboarding and induction, completing joining documentation and employment contracts for every new hire.

Employee lifecycle and HR operations

- Maintain employee records, ID proofs and contracts, and track leave in the HRMS in line with company policy.
- Coordinate performance appraisal cycles: circulate forms, track submissions and compile appraisal records.
- Resolve employee grievances as the link between employees and management.
- Roll out and communicate HR policies, keeping all HR activity compliant with labour laws.
- Plan engagement activities, team-building events and internal communications.
- Handle exits end to end, including **5 in 2026**: exit interviews, clearance and relieving letters.

ISO coordination

- Coordinated the company's **ISO 9001:2015 (QMS)** and **ISO 27001:2022 (ISMS)** documentation with external consultants through initial certification of both; now supporting preparation for the second-year surveillance audit.
- Draft and maintain ISO-aligned policies, SOPs, process documents and records.

AI in HR

- Built **Custom GPTs** for policy drafting, HR document generation and job description writing, an assistant that structures difficult employee conversations.

PROJECTS

HireProof — privacy-first resume screening

Live demo

- Browser-based tool that removes names, contacts and ID numbers **on the recruiter's own device** before any AI review.
- Reads resumes **like a domain expert, not a keyword matcher**: separates skills shown in real project work from skills only claimed, and flags technically wrong or implausible claims with a specific question to ask about each.
- Detects manipulation: text copied between applicants, keyword stuffing, dates that don't support the claimed experience, and hidden instructions aimed at AI screening tools.

- Keeps a person in charge of every decision through an approval step, a session audit record and DPDP-aware privacy controls.
- Built with AI pair-programming as a single-file web app for desktop and mobile; runs free with offline rules or the user's own AI key.

EDUCATION

MBA, Human Resources Management — St. Ann's PG College *2022 – 2024*
